MEDIA MATTERS

Abrasive Flow Media from Extrude Hone

Whether you want delicate finish honing or aggressive surface removal, we have specially formulated Extrude Hone Media for the Job. Extrude Hone is committed to delivering excellence, and we have taken every step to back this statement.

Original media from Extrude Hone should be your choice. We deliver media all round the world.

GET MEDIA RIGHT

+ Quality

- Media production by a team of highly experienced engineers and operators
- Chemical PhD scientist to support the development of new media types
- State of the art process control
- Collection of customer batch sample media to ensure traceability and repeatability
- Testing and tracking quality of incoming raw products using Abrasive Particle Size Analysis

+ Optimize media life

- Average shelf life of 6 months
- Media must be mixed well before use: if oil has settled on the top DO NOT DRAIN THE OIL
- Media should be stored in a climate controlled room between 65°F and 80°F (18°C and 27°C)
- Keep media away from contaminants
Max operating temperature 105°F (40°C)

+ Complete offering

- Media design to application
- Schedule agreements
- Media maintenance program
